MUNICIPAL BUILDING • 1 EAST MAIN STREET • ROCKAWAY, NEW JERSEY 07866

172-36.D Any business owner requesting the right to display temporary banner signs shall apply for and have issued a permit by the Borough of Rockaway before such business owner may display such signs. There shall be imposed a fee of \$40 for each permit period (consisting of 21 consecutive days), provided no business owner may apply for more than four permit periods in any calendar year, and there shall be not less than 15 consecutive days between each permit period. Owners of residential property located in any zone in the Borough of Rockaway shall not be permitted the right to display banner signs at any time. The application for a banner permit shall be submitted to the Zoning Officer not later than 10 days prior to the commencement date of any permit period. Any tenant of a business owner must have the written consent of the business owner or owner of the property from which the banner sign shall be displayed.

172-39.E No more than two banner signs may be permitted in any permit period. If a business owner shall have more than one tenant in his building who wishes to utilize banner signs, no tenant shall be permitted to display more than one banner sign for each permit period where more than one tenant or business owner desires to display a banner sign. Banner signs may be displayed as wall-mounted or ground-mounted signs, provided the size of such banner sign and its location meet in all respects the requirements for permanent signs for such business owner's property.

(1) Size of banner signs. If a business owner makes application for one banner sign during any permit period, such banner sign shall not, in any event, exceed 30 square feet in sign area (excluding any wall- or ground-mounting hardware). If the business owner shall make application for two banner signs, no such banner sign shall exceed 15 square feet in size (excluding any wall- or ground-mounting hardware). No business owner or tenant shall utilize or maintain any banner sign beyond the boundaries of the business owner's property. If a business owner or tenant desires to mount a banner sign on a wall of a building, such banner sign shall not protrude above the roofline of the building or structure upon which such sign is mounted and must lie flat against the building surface at all times. No banner sign shall be permitted to "stream" in the wind.

(2) Setback requirements. Any banner sign which is ground-mounted shall not be closer to any side line of the property owned by the business owner or leased from the business owner than 10 feet from said side line. No banner sign shall be strung across any roadway nor shall such sign be affixed to any utility pole. No such banner sign shall be affixed to any other structure adjoining the property of the business owner or tenant of the business owner.

(3) Ground-mounted banner signs. Any ground-mounted banner sign shall be securely attached at the top and bottom corners of the metal or other durable structure frame designed to hold such banner sign.
